*"Sage didn't just draw what we asked him to draw, he pushed us with new ideas and helped us reach a design that was both unexpected and exactly what we wanted." **

Sage K. Saskill

walking the talk

Are you passionate about sustainability? SDNW is!

S.A.G.E. DESIGNS NW is committed to the collaborative process of manifesting your building dreams in the world of design at whatever "Green" level you are ready to realize. We begin by looking at your unique project from many perspectives including design, budget, build-ability and your personal stylistic preferences.

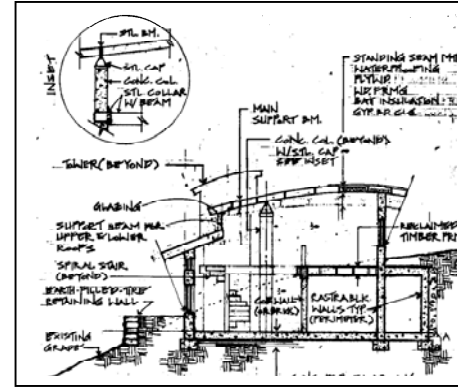

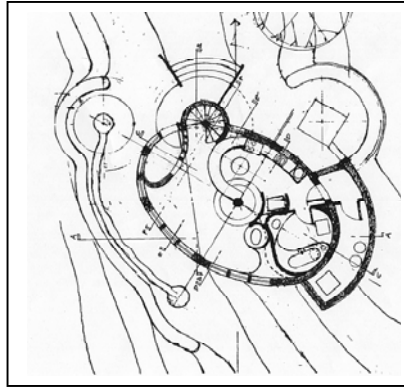

Sage has walked the talk of ecological design for over two decades – long before green was cool – & continues to research and utilize time-tested as well as cutting edge innovative methods & materials.

Architecturally, aesthetically and environmentally we can co-create a healthy & peaceful place in balance with the natural surroundings of your site...

let us together invent a space that inspires living, loving and learning to the fullest life has to offer.

architectural design services for the people from concept thru construction
modest to modern & all styles in between

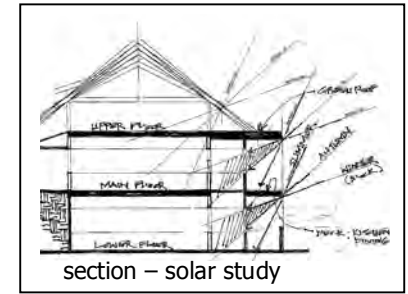

STUDIO MOBIUS ~ SUSTAINABLE MATERIALS DEMONSTRATION PROJECT

"As we tried to fit more and more features into our home design, Sage challenged us to find ways of achieving our goals within the footprint we initially desired. Sage's commitment to the environment helped us achieve a design that is not just more environmentally friendly, but will also be a more livable home." *Ian G. Taylor

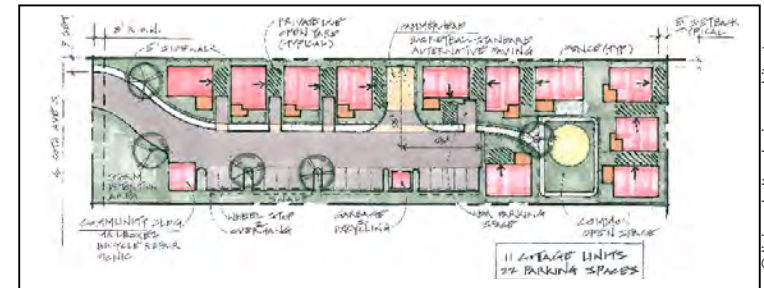

"Sage wore many hats on our odyssey to plan, design and import a state-of-the-art prefabricated house from Germany. He served as architect, adviser, friend and warrior - interfacing with various city departments to obtain permits to build on our unique site. He was especially adept at finding solutions to challenging environmental problems. Sage's design work produced a truly functional house with a small footprint where we intend to live happily ever after." Harriss K. Muller
